

Name: Prathamesh Shetty
Div: D15B
Roll No: 53

Experiment No:1

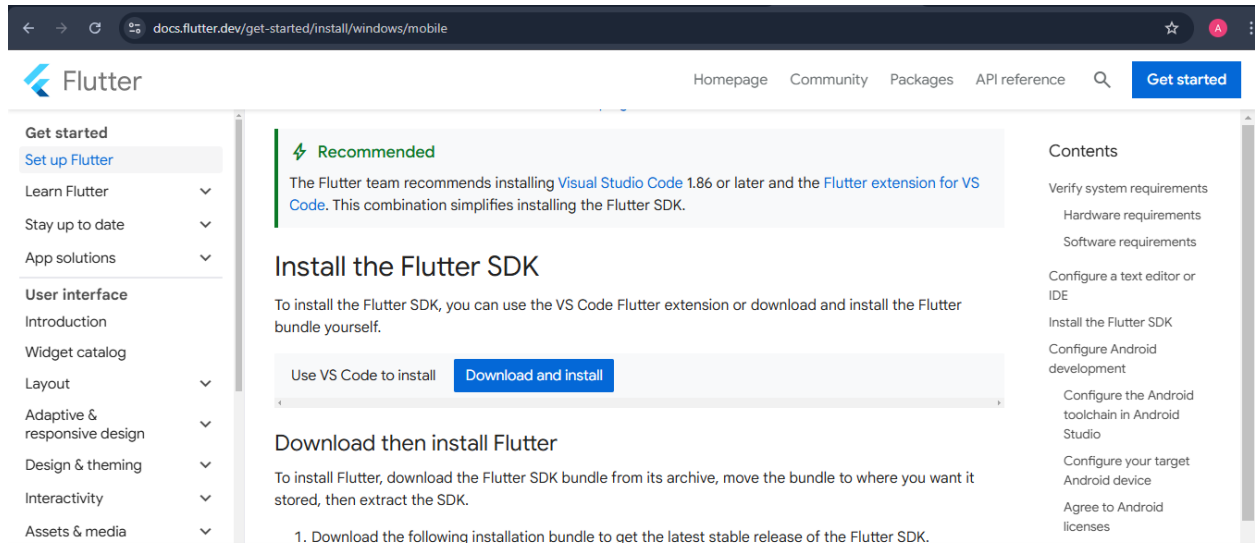

Aim:

Step 1: Download the installation bundle of the Flutter Software Development Kit for windows. To download Flutter SDK, Go to its official website <https://docs.flutter.dev/get-started/install> , you will get the following screen.

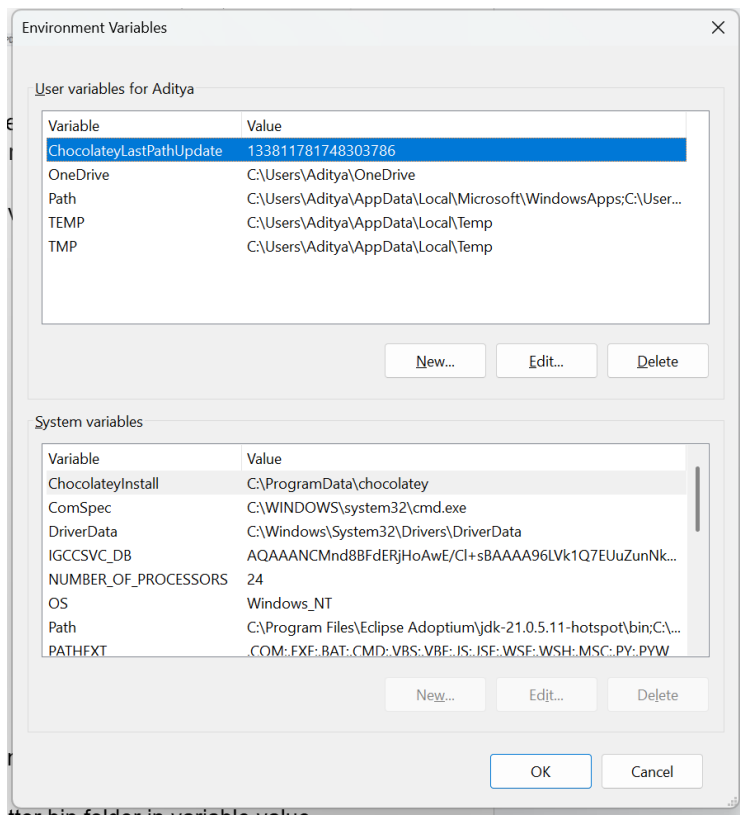

Step 2: Next, to download the latest Flutter SDK, click on the Windows icon. Here, you will find the download link for SDK.

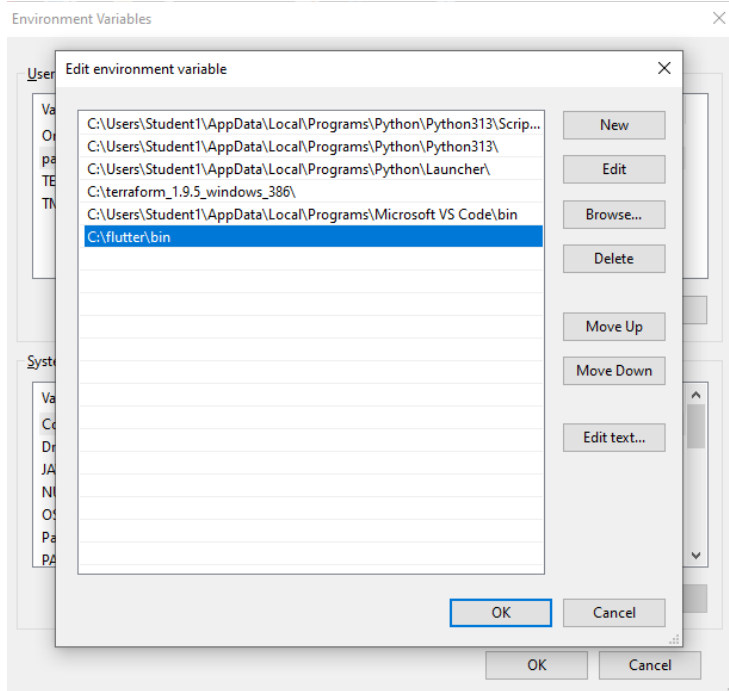

Step 3: When your download is complete, extract the zip file and place it in the desired installation folder or location, for example, C: /Flutter.

Step 4: To run the Flutter command in regular windows console, you need to update the system path to include the flutter bin directory. The following steps are required to do this:

Step 4.1: Go to MyComputer properties -> advanced tab -> environment variables. You will get the following screen.

Step 4.2: Now, select path -> click on edit. The following screen appears

Step 4.3: In the above window, click on New->write path of Flutter bin folder in variable value -> ok -> ok -> ok

Step 5: Now, run the \$ flutter command in command prompt.

```

Command Prompt - flutter -- × + ▾

Microsoft Windows [Version 10.0.22631.4830]
(c) Microsoft Corporation. All rights reserved.

C:\Users\user>flutter --version
Flutter 3.27.4 • channel stable • https://github.com/flutter/flutter.git
Framework • revision d8a9f9a52e (10 days ago) • 2025-01-31 16:07:18 -0500
Engine • revision 82bd5b7209
Tools • Dart 3.6.2 • DevTools 2.40.3

C:\Users\user>

```

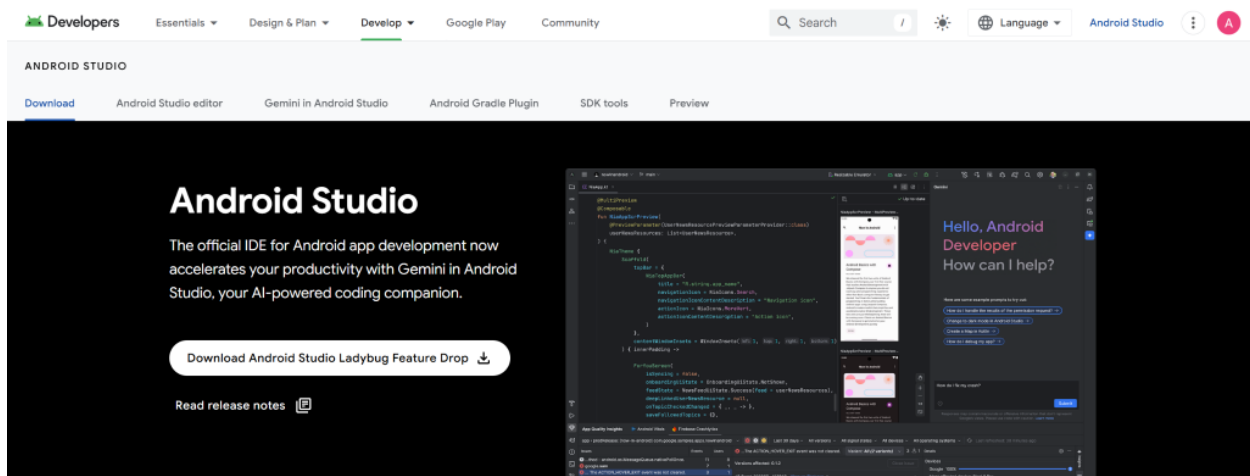

Now, run the \$ flutter doctor command. This command checks for all the requirements of Flutter app development and displays a report of the status of your Flutter installation.

Step 6: When you run the above command, it will analyze the system and show its report, as shown in the below image. Here, you will find the details of all missing tools, which required to run Flutter as well as the development tools that are available but not connected with the device.

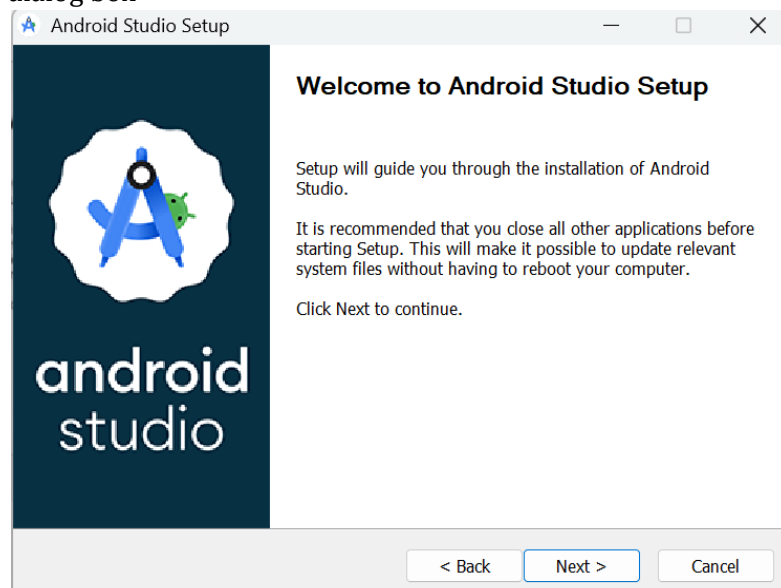

```
C:\Users\user>flutter doctor
Doctor summary (to see all details, run flutter doctor -v):
[✓] Flutter (Channel stable, 3.27.4, on Microsoft Windows [Version 10.0.22631.4830], locale en-IN)
[✓] Windows Version (Installed version of Windows is version 10 or higher)
[!] Android toolchain - develop for Android devices (Android SDK version 35.0.0)
    ! Some Android licenses not accepted. To resolve this, run: flutter doctor --android-licenses
[✓] Chrome - develop for the web
[✓] Visual Studio - develop Windows apps (Visual Studio Build Tools 2019 16.11.31)
[✓] Android Studio (version 2024.2)
[✓] VS Code (version 1.97.0)
[✓] Connected device (3 available)
[✓] Network resources
```

Step 7: Install the Android SDK. If the flutter doctor command does not find the Android SDK tool in your system, then you need first to install the Android Studio IDE. To install Android Studio IDE, do the following steps.

Step 7.1: Download the latest Android Studio executable or zip file from the official site.

Step 7.2: When the download is complete, open the .exe file and run it. You will get the following dialog box

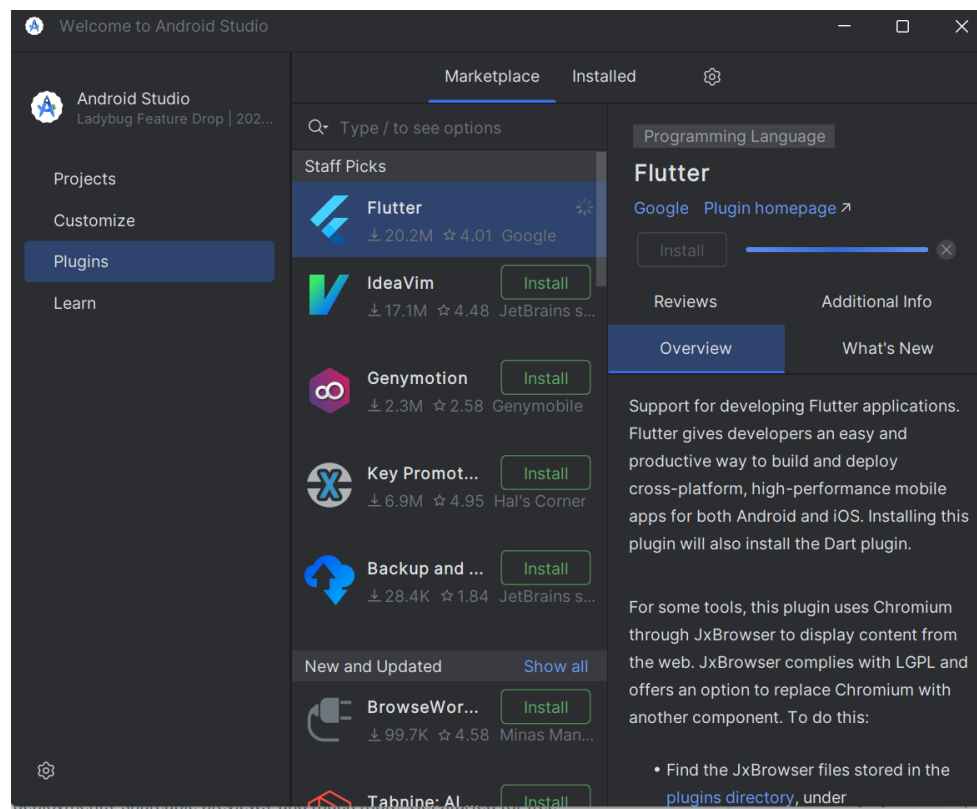

Step 7.3: Follow the steps of the installation wizard. Once the installation wizard completes, you will get the following screen.

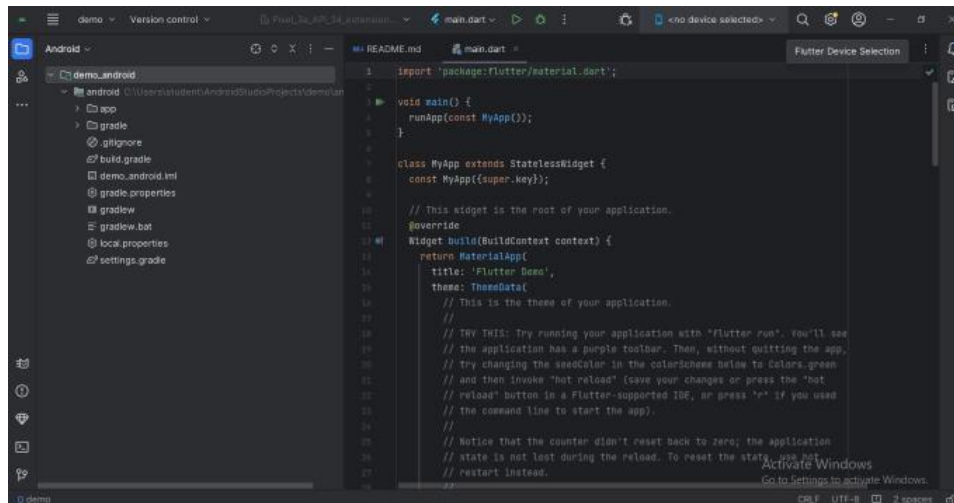

Step 7.4: In the above screen, click Next-> Finish. Once the Finish button is clicked, you need to choose the 'Don't import Settings option' and click OK. It will start the Android Studio.

Step 8: Next, you need to set up an Android emulator. It is responsible for running and testing the Flutter application.

Step 8.1: To set an Android emulator, go to Android Studio > Tools > Android > AVD Manager and select Create Virtual Device. Or, go to Help->Find Action->Type Emulator in the search box. You will get the following screen.

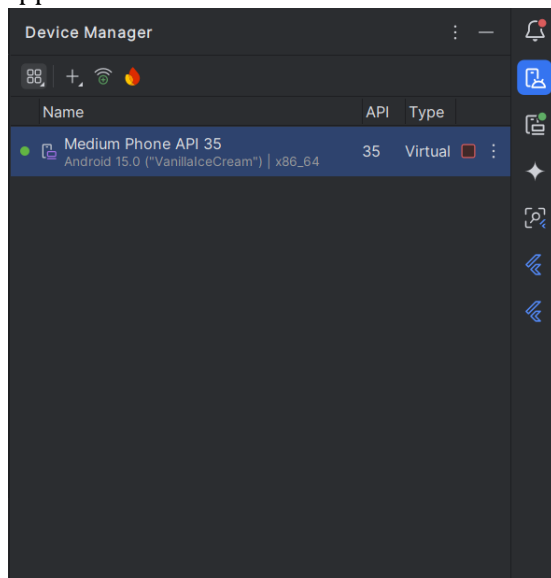

Step 8.2: Choose your device definition and click on Next.

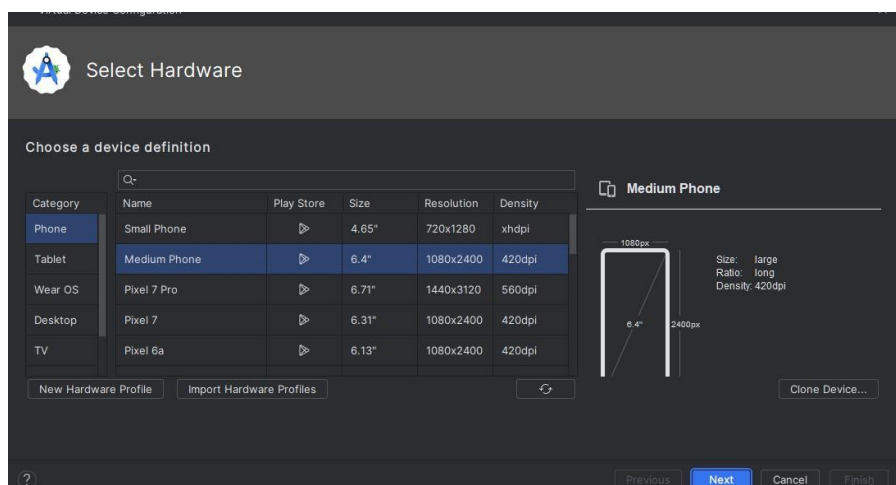

Step 8.3: Select the system image for the latest Android version and click on Next.

Step 8.4: Now, verify the all AVD configuration. If it is correct, click on Finish. The following screen appears.

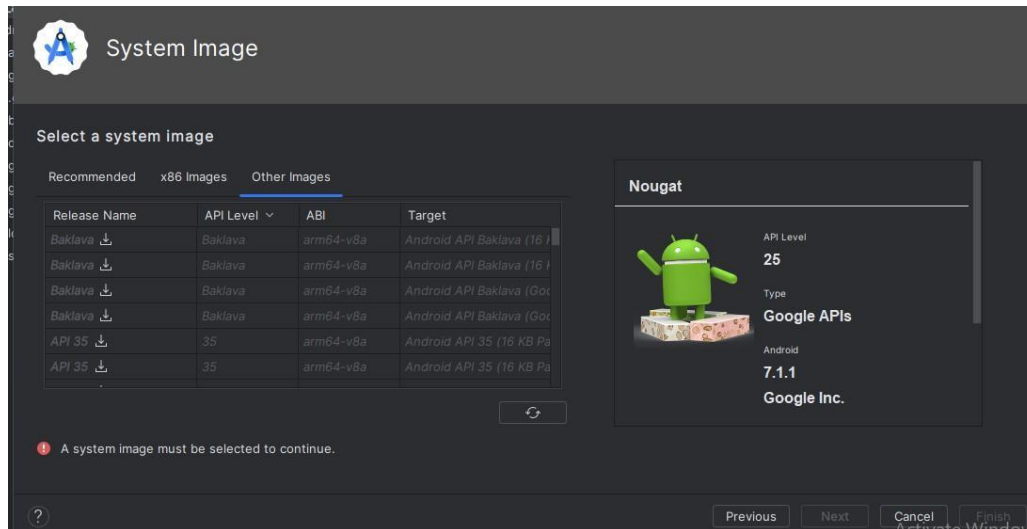

Step 8.5: Last, click on the icon pointed into the red color rectangle. The Android emulator

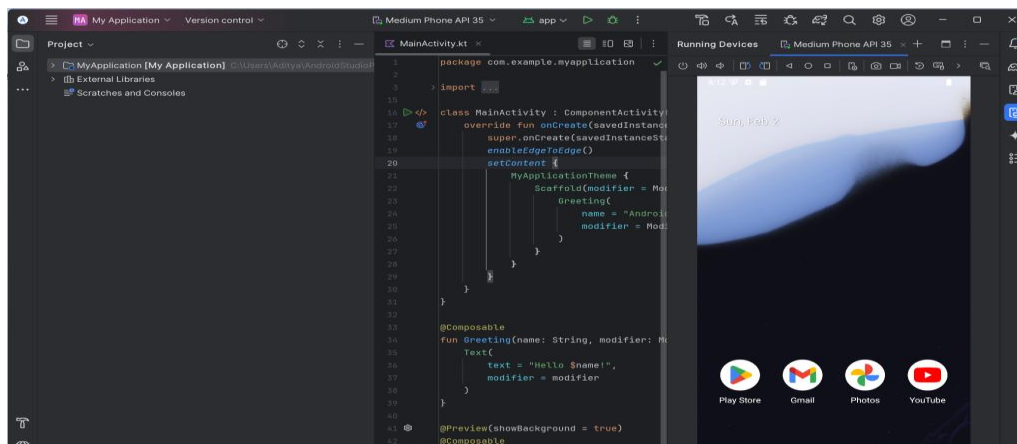

Step 9: Now, install Flutter and Dart plugin for building Flutter application in Android Studio. These plugins provide a template to create a Flutter application, give an option to run and debug Flutter application in the Android Studio itself. Do the following steps to install these plugins.

Step 9.1: Open the Android Studio and then go to File->Settings->Plugins.

Step 9.2: Now, search the Flutter plugin. If found, select Flutter plugin and click install. When you click on install, it will ask you to install Dart plugin as below screen. Click yes to proceed.

Step 9.3: Restart the Android Studio.

Conclusion:

In conclusion, the experiment was successfully completed by installing **Android Studio** and **Flutter** on the device. This setup is essential for developing and running Flutter applications. The process involved downloading and configuring the necessary tools, ensuring that both the **Android Studio IDE** and the **Flutter SDK** were properly installed and configured with the required dependencies. After completing the setup, the environment was successfully verified using the flutter doctor command, confirming that the system was ready for Flutter development. This foundational step paves the way for developing mobile applications using Flutter in the future.
